

NCIC Bridge

The MAX.vms NCIC Bridge forms an interface between MAX.vms and the FBI's National Crime Information Center (NCIC).

NCIC data is only available to trained law enforcement officers and investigators. Hunt Engineering Systems' NCIC Bridge is the first system that allows non-law enforcement officers the ability to easily and economically screen each visitor or vehicle against NCIC without viewing the actual data.

The NCIC Bridge is an added technology to MAX.vms credential & visitor management system. Visitor data becomes an active asset by giving administrators access to queries and custom reports.

NCIC Bridge

- ✓ Fully integrates with MAX.vms – HES' credential and visitor management system
- ✓ Usable by non-Law Enforcement Officers
- ✓ Automates background checks on all processed visitors
- ✓ Enables more effective use of law enforcement resources

IMPROVING SECURITY //

- ✓ Checks every processed visitor
- ✓ Use of current NCIC data
- ✓ Allows for focused investigation efforts

To learn more about how the NCIC Bridge can help make your enterprise more secure please contact Hunt Engineering Systems.

Hunt Engineering Systems, Inc. (HES) is committed to improving security through innovation by providing the government with visitor and credential management systems.
