## IMPROVING SECURITY //

---

- Complete history of all visitors
- Connectivity to all "site" locations
- Increased productivity - Decreased workload on security staff
- Real-time information
- Highly stable and reliable
- Expandable to unlimited users and credential types
- Meets NIST standards (FISMA and DIACAP)
- Fully configurable to your needs
- Customizable to your security process and regulations

MAX.vms is a customizable web-based visitor management system that helps protect people, assets, and critical infrastructure. Whether you need to manage visitors at a single location or at many locations around the globe there is a MAX.vms solution for you. Call today and Hunt Engineering will show you how to improve your security without losing any of the data in your current system.

## EXTEND THE POWER OF MAX //

---

### // MOBILEMAX

Handheld devices allow increased freedom and mobility for security personnel. Update visitor data on the go.

### // KIOSKS

Kiosks allow visitors to scan their ID and receive a visitor pass, reducing wait times.

### // NCIC BRIDGE

Allows government entities to easily and economically screen each visitor or vehicle against real NCIC data.

### // BLACKLIST AGGREGATOR

Allows for rapid vetting for every single visitor and checks names against published government Terrorist Watch Lists and local barment lists.

### // LPR CAMERAS & UVIS

Increased effectiveness of vehicle inspections

### // BARCODE READER

Accurate record of each visitor

### // DOCUMENT AUTHENTICATOR

Detect fraudulent IDs
