

# Mobile MAX

---

MobileMAX is ideal for guard personnel stationed at points of entry such as entrance roads or building entrances. It can also be used in the field to spot check individuals that have already entered the facility. Running a customized visitor and event management client on a mobile device allows for rapid deployment.

MobileMAX interfaces with MAX.vms either by dock and go method or an optional real-time wireless connection. When used wirelessly, any data entered or edited on the MobileMAX terminal is instantly viewable by another MAX client.

MobileMAX is used in conjunction with the MAX family of visitor and badge management systems. MobileMAX allows users the freedom of mobility.

# MobileMAX

---

- ✓ Fully integrates with MAX.vms – HES' credential and visitor management system
- ✓ Data on the Go! Lightweight and Convenient
- ✓ Get security out of the guard stations and into remote environments
- ✓ Data is transferred and maintained on a centralized server
- ✓ Add last minute visitors on the go

## IMPROVING SECURITY //

---

- ✓ Verifies PIV, CAC, TWIC cards
- ✓ Verifies State-Issued Driver's Licenses containing 2D Barcodes
- ✓ Verifies MAX.vms Badges
- ✓ Rapid deployment
- ✓ Real-time information anywhere
- ✓ Extend security and visitor data to entire perimeter

MobileMAX completely integrates with Hunt Engineering Services' MAX.vms credential and visitor management system. MAX.vms is a customizable web-based Visitor Management System that helps protect people, assets, and critical infrastructure. Visitor data collected becomes an active asset by giving administrators access to queries and custom reports.
